Parameters

Name	Value
Length	1000 mm
PTO speed	540 rpm
PTO Power	66 kW
Maximum Torque	1165 Nm

Description

Series 8 PTO shaft designed for the JANSEN BX-62RS and BX-92RS and all JX tractor shredders (JX-72RS, JX-102RS). Recommended for tractors with a PTO brake: after the PTO is switched off, the shredder rotor keeps turning due to its flywheel mass, and the integrated freewheel lets it run down on its own. A shear bolt protects the driveline against overload.

- Series 8, triangular profile, 1 3/8" 6-spline on both ends
- Length 1000 mm (cross to cross)
- Max. 66 kW (90 HP) and 1165 Nm at 540 rpm
- Freewheel, clockwise rotation
- Shear bolt overload protection 2500 Nm ±10 %, M10 bolt

Scope of delivery: PTO shaft with guard and safety chains.
