Description

Providing fresh and clean drinking water is very important in dairy farming. JFC offers a wide range of drinkers suitable for both indoor and outdoor use. The material used in our drinkers has a high resistance to frost and thaw, which is a particularly important feature during frosts. Each drinker is designed with rounded edges to keep animals safe. Strategically placed mounting holes or handles ensure safe use. All bowl drinkers (excluding DBL5 and DBL7) have left or right water inlet. The DBL4 micropoid and the DBL5 and DBL7 pressure nasal drinkers have double walls that are extremely impact-resistant and withstand even the most intensive use.
