Description

Truck Tank COMBI fuel tanks meet the EU requirements concerning carriage of dangerous goods by road defined in the ADR International Agreement, section 6.5. The JFC Truck Tank Combi is a twin fuel delivery system. It is diesel fuel tank with an added AdBlue® delivery system. STRUCTURE The TT COMBI is designed with special ribbing which acts as a baffle whilst in transport, but also doubles up the tanks strength. DESIGN The unique design of TT Combi means that does not take up unnecessary space in your vehicle and can be accessed from either side of the tank. FUNCTIONALITY The TT Combi is effectively two tanks in one. It has both a diesel and AdBlue® distribution system combined, making it ideal for use in contracting work and avoiding the need to carry an extra tank, this saves you time and space. With the Truck Tank Combi, you never run out of fuel on the job. Additionally, with our Solar option the TT Combi becomes a self-sufficient tank without the need for any external power sources.
