Parameters

Name	Unit
Torque	370 Nm
Oil flow	15 - 60 l/min
Weight	12 kg

Description

The Jansen JSK-350 log splitter cone with 350 mm splitter cone incl. MS-PG pallet fork shank to attach to your mini excavator. Guarantees a safe and efficient option for splitting logs and tree roots.

The tempered, replaceable tip not only makes this splitter cone tough, but also suitable for long-term use. The splitter cone has a \varnothing 51 mm shank.

With the Jansen JSK-350 log splitter cone you can work regardless of the weather without a lot of physical effort. It is also easy on the machine, as the wood is split by the log splitter cone, not the actual machine. Another advantage: Minimal risk of accidents.

Depending on the nature and length of wood, the cone splitter processes logs with a maximum diameter of up to 50 cm!

The Jansen JSK-350 log splitter cone is available in various styles. Choose from the model variants: "MS-01", "MS-03" or "pallet fork".

Technical specifications:

Model variant "MS-PG" pallet fork
