Parameters

Name	Value
Weight	130 kg
Torque	2,880 Nm

Description

The Jansen® JSK-500 log splitter cone is the ideal solution for powerful, efficient log splitting.

EFFICIENT AND STRONG!

The impressive torque of up to 2,880 Nm allow this log splitter cone to easily and efficiently split logs. The max. 240 bar operating pressure ensures reliable performance under various conditions. Equipped with a powerful drive powered by the hydraulic system of the carrier vehicle (tractors, farm loader, excavator, etc.), the Jansen® JSK-500 offers maximum flexibility and compatibility. The Euro mount enables easy attachment to various vehicles.

EURO MOUNT

The Euro mount of the Jansen® JSK-500 offers a universal solution for a wide range of carrier vehicles. Thanks to the widespread Euro mount standardization, the cone splitter can be easily attached to tractors, yard loaders and other vehicles with a corresponding Euro mount. This option enables quick conversion and maximum flexibility when using the cone splitter. The hydraulic connections for the carrier vehicle are not included in the delivery. The hose connections have a G 1/2" connection with union nut.

Regardless of the selected mounting bracket, the Jansen® JSK-500 with its powerful technology and robust design guarantees reliable log splitting in various application scenarios.

FACTS THAT SPEAK FOR THEMSELVES!

2,880 Nm torque

Various optional attachment options

Incl. Euro mount

Efficient operation

Easy and safe handling

TECHNICAL DATA:

Drill drive: Hydraulics of tractor, farm loader, excavator, etc.

Torque: max. 2,880 Nm

Operating pressure: min. 180, max. 240 bar

Required fluid flow rate: min. 30 to max. 75 litres

Weight: approx. 130 kg
