Parameters

Name	Unit
Torque	2,880 Nm
Weight	130 kg

Description

The Jansen® JSK-500 log splitter cone is the ideal solution for powerful, efficient log splitting.

EFFICIENT AND STRONG!

The impressive torque of up to 2,880 Nm allow this log splitter cone to easily and efficiently split logs. The max. 240 bar operating pressure ensures reliable performance under various conditions. Equipped with a powerful drive powered by the hydraulic system of the carrier vehicle (tractors, farm loader, excavator, etc.), the Jansen® JSK-500 offers maximum flexibility and compatibility. The Euro mount enables easy attachment to various vehicles.

MS-03 MOUNT

The MS-03 recording provides a solid connection and allows for the attachment of the Jansen® JSK-500 cone splitter to your mini excavator up to 2 tons machine weight. The simple installation ensures quick readiness and makes the JSK-500 a reliable partner for various wood processing projects. Hydraulic connections for the carrier vehicle are not included. The hose connections feature a G 1/2" connection with a union nut.

Regardless of the selected mounting bracket, the Jansen® JSK-500 with its powerful technology and robust design guarantees reliable log splitting in various application scenarios.

FACTS THAT SPEAK FOR THEMSELVES!

2,880 Nm torque

Various optional attachment options

Incl. MS-03 mount

Efficient operation

Easy and safe handling

TECHNICAL DATA:

Drill drive: Hydraulics of tractor, farm loader, excavator, etc.

Torque: max. 2,880 Nm

Operating pressure: min. 180, max. 240 bar

Required fluid flow rate: min. 30 to max. 75 litres

Weight: approx. 130 kg
