Description

The MT1 Land Leveler by Metal-Technik is a robust and versatile agricultural implement designed to smooth and level soil surfaces. It's ideal for preparing fields before planting, leveling uneven terrain, or maintaining farm paths and roads.

The MT1 is available in multiple widths:

1300 mm to 2500 mm, suitable for various field sizes

Solid steel construction for durability

Leveling elements height: 120-160 mm

Weight range: 183-303 kg depending on model

This product is ideal for:

Farmers seeking efficient soil preparation tools

Construction crews working on small-scale ground leveling tasks

Municipal services needing maintenance tools for public areas like parks or pathways

Agribusinesses looking to upgrade their field equipment

With its sturdy build and broad utility, it's especially beneficial for professionals who need reliable performance across varying soil conditions.
