Description

Specific machines apt to the litters renovation in the poultry farming sector, which allow to maintain a comfortable and healthy environment during the entire production circle. The strength of these machines is represented by the counter-rotating tilling rotor (in relation to the tractor forwarding direction), combined with a reversible lower scraper blade, allow the crumbling of any type of litter, augmenting the aeration of it. The Speedy is a compact and maneuverable machine, and it's available up to 230 cm working width. Basic machine: Universal 3 point linkage Cat. 2, Single speed gearbox 540 rpm PTO, Lateral transmission driven by chain in oil bath, Opposite side transmission in oil bath, Removable flanged rotor Ø430 mm, High rotor rpm, up to 800 rpm, Automatic chain tensioner on spring, Cassette oil seals on rotor, Large distance between rotor and case, Rear hood adjustable in height by crank handles, Reversible lower scraper blade, made with high resistance wearing material, Cardan shaft with shear bolt torque limiter SB type (1"3/8 Z=6 tractor side yoke)
