Description

MAC Hydraulic arm-mulcher to be coupled on backhoes with ranges from 5 m to 6 m and telescopic up to 7 m. The front coupling system is adjusted on the blade support by means of a structure according to the backhoe model. Handling by means of proportional distributor with joystick and perfect adjustment of all handling functions by means of a cable to the backhoe cab. Lateral positioning with all movements and ranges at distances of between 5 and 7 metres. Perfect staggering of movements, as well as efficient work where required. 1 or 1.20 m mower heads with knife, hammer or interchangeable cutting system. The machine has the necessary counterweights in case they are required by the carrier.
