Description

The AUTOBHAN range is clearly aimed at professionals in the field of roads and green spaces, groups and third-party work. With a horizontal range from 6.00 to 8.00 mts, as well as a hydraulic circuit of pistons from 72 to 80 CV. It allows a wide rhythm of work as well as perfect finishes. Arms in tube of 140×140. Systems of hooks to the tractor with detachable rear articular subjection. The working heads in 1,2 or 1,4 mt. They allow to mount all kinds of cutting tools. From blades with shackle, to blades interchangeable by hammers. For forestry and civil engineering work, forestry heads are mounted with crushing capacity of up to 18 cm. The handling system is by means of a proportional joystick with a 7" screen. Highest quality equipment with REXRHOT elements, and/or VOLVO-PARKER.
