

## Dal Degan Manda 300

### Mounted sprayer 300L

#### Parameters

Name	Unit
Tractor Motor Power	22-26 KW
Tractor Power	30-35 HP
Weight	125/135 kg
Height	1200 mm
Width	2050 mm
Length	1200 mm

#### Description

Spraying group ideal for medium and large-sized farms. The frame is varnished and made of metal pipes. The tank consists of two parts: the main tank and hand-washing tank. Equipped with "BETA" boom, built with steel tubes and high resistant plastic resin nozzles-holder pipes, is mounted on sliding rails and adjustable at any height, single nozzle-holders are with check-valve. The filter has the possibility of self-filling from natural sources (wells, reservoirs for water accumulation, sources, etc.). The homogenization of the preparation is accomplished by a hydro-injector. The bottom hinge is realized in three points with a Ø22 / 28 mm sleeve. There is also the possibility of installing prochromic tubes, pressure regulators with multiple outputs and other equipment specified in the optional equipment.
