Parameters

Name	Unit
Working width	600 mm
Dimensions	800x600x500 mm
Weight	34 kg

Description

The 600 mm excavator bucket is hydraulically pivoted and it is perfect for earthworks, trenching and shoreline design. The design allows hydraulic rotation of the bucket in the range of $\pm 45^\circ$, which facilitates precise work.

The 60 cm hydraulic bucket is the perfect accessory for your Jansen excavator (MB-1000 and MB-1500).

In addition to the bucket, the scope of delivery also includes the matching hydraulic hoses and 2 throttle discs for hoses installation.

Technical specifications:

Working width: 60 cm

Opening dimension: 27x59 cm

Depth: 30 cm

Volume: approx. 30 liters

Hydraulic swivel: $\pm 45^\circ$
