Parameters

Name	Value
Fuel	Normal Petrol .
Weight	100 kg
Working width	1000 mm
Max speed reverse	2,5 km/h
Max speed forward	2,5/3,6/4,5 km/h
Wheels	13-5.00-6 .
Length	1600 mm
Width	1030 mm

Description

The Jansen MKB-500 sweeper has a powerful 6.5 HP petrol engine, is self-propelling, and comes with a recoil and electric starter that can be used very easily to start the engine.

Here we are offering sweepers that come in a set with a sweeper container and a snow blade. With the container the dirt can be collected immediately and conveniently disposed of.

Light snowfalls can be easily swept away with the sweeper alone. If the snow is higher than 3-5 cm, you simply have to use the snow blade included in the set. This can be mounted very easily and without using any tools.

The electric starter is powered by a 12 volt battery. A charger comes included with which you can charge the battery at a 230V power outlet. It is recommended you use this external charging method particularly for holding of charge when the machine is not being used for a long time. The sweeper has a built-in socket to connect the external charger - the battery therefore does not need to be removed.

The sweeper has 3 forward gears and 1 reverse gear - that way you can always find the right speed, and using the accelerator adjust it even further.

The height and pressure of the brush on the ground can be regulated via a centrally mounted handle. The brush can also be adjusted at 5 different sideways levels.

Plus there are 6 gears to adjust the rotational speed of the brushes.

-Performance: approx. 4400 m²/h
-Amount of engine oil: approx. 1L (10W40 or 15W40)
-Fuel consumption: approx. 0.5 L/h
-Bristle dimensions: 1.0 x 130 mm
-Bristle diameter: 350 mm
