Parameters

Name	Unit
Weight	85 kg
Working width	1450 mm
combs N°	9 .
max. width	165 (cm)

Description

Belt rakes M series are light machines that can be coupled frontally to any motocultivator or mower. Extremely simple and practical, these models rake, flip, spread and aerate the hay gently without twisting it and damaging it. Equipped with a single band belt with 2 teeth (4 points) for each comb, they require little power so can be used with small motocultivators in steep areas. Can be coupled frontally to any type of mower and motocultivator. Safe thanks to the CE standards protections. Sandblasting and oven powder coating. The manufacturer gives 2 years warranty.
