Description

The Mowing bucket has several advantages:

- Mowing bucket for ditch maintenance
- Available in light and heavy models
- Suitable for various machines, including Herder Grenadier
- Available in various working widths, max. up to 8.60 m
- Maximum return at minimum cost

The mowing bucket is designed to mow grass and reed-like vegetation in ditches and watercourses, both above and under the water. Everyone wants a good mowing result, but everyone also wants an outline of the costs. A unique design, the application of the best materials in combination with quality workmanship gives an unequalled tool. A mowing bucket that performs everywhere and at all times.

-suitable for mini excavators up to 5 tonnes
