Description

Metal-Technik Potato bucket

A tool used to transport larger-sized agricultural crops, in particular root crops (potatoes, beets).

Screw-on sides minimize the risk of damage when scooping up the material.

The design has been designed in such a way that after installing a dedicated insert, it also allows loose materials.

The bucket is adaptable to work with front loaders, loaders and skid steer loaders.

The blade is made of steel with increased abrasion resistance (hardox).

Euro mount as standard.
