Description

Metal-Technik Straight plough super light

The straight, super light plough, has a compact and light structure, which makes it ideal for winter maintenance of utility areas as well as urban areas, i.e. snow removal from squares, pavements, parking lots, housing estate roads.

The low weight allows it to work with low-power carriers.

Scraper bar made of wear-resistant steel or rubber.

The tilt is controlled manually in one of 5 positions (optionally from the driver's cab by means of a hydraulic cylinder).

The plough is equipped with a support foot.

It works with tractors with a power of 16HP to 60HP.

As standard, the three-point linkage mounting category 0 or 1 small or large.
