Description

Metal-Technik Folding plow TYTAN

The heavy, foldable hydraulic plough is designed for front loaders and loaders. It can also be attached to the three-point in the tractor. It is used for snow removal and leveling of the ground, e.g. squares, roads, parking lots, factory areas, etc., as well as for removal, scraping of manure and leveling dirt roads in seasons other than winter.

The flexible, rubber-made scraper bar makes it resistant to protruding ground elements during snow removal.

In the three-point linkage standard category II or III
