**Parameters**

Name	Value
Lifting height	3920 mm
Weight	617 kg
Lifting capacity	1800 Kg
Minimum HP	90-150 hp
Speed	8 KM/H

Description

Front Loaders Metal-Technik front loaders are designed to guarantee maximum performance – from general mobility down to the smallest details. As a manufacturer of front loaders, we use high-quality S355 steel, and the structure is reinforced with two 90 mm diameter cross tubes and a reduced-diameter cylinder – perfectly compatible with tractors with low hydraulic power. The paint coating consists of a primer and a final powder-coated layer. The front loader is operated via a joystick. It comes equipped with a quick coupler for mounting, a full hydraulic quick coupler, mechanical parallel guidance, and a loader parking stand. The front loaders work with accessories such as: grapple, crocodile grab, bucket, crocodile bucket, pallet forks, and cutters. They are designed for loading and unloading crops, manure, silage, loose materials, and pallets, as well as for transport tasks on the farm. As a recognized manufacturer, we offer professional front loaders that meet all your expectations in terms of both price and quality. The standard joystick and distributor are manufactured by well-known brands.
