Description

The hydraulic weeder is used to remove weeds and loosen the soil from row crops such as strawberries, cucumbers, etc. Thanks to the cultivator, the cultivation works are much faster, more convenient and more efficient. The device has two hydraulic motors to which working elements, i.e. loosening knives, exchangeable for springs are attached. The machine is fully adjustable so that it can be adapted to any type of planting, in addition, the machine can be equipped with a fertilizer grain pan and a soft seat.

- soft seat
- adjustable three point linkage
- interchangeable working tools
- speed control
- ergonomic operator position
- adjustable support wheels
