Description

Mower-shredder (one rotor) is a 3-point hitch machine, designed for aggregate with 0,6 - 0,9T class tractors, PTO - driven. Mower-shredders are useful in orchards, fields or meadows. We can use shredder for mulching grass, crop residue, straw, branches (up to Ø4 cm), bushes. Mulched plants lay on ground and became organic fertilizer. Machine has adjustable working height (3 cm and higher), which allows to work even on layed plants. Higher shredding level allows to mulch haulms and roots crop residue. Machine can't be used on terrain covered with stones. As the only company in Poland, we produce machines equipped with modern gear unit PK10 with power input of 55 kW.

- rotating rear support wheel
- adjustable cutting height
- hinged working knives
- counter knives to crush branches
- front supporting wheel
- powerful gear with a power output of 55kW
- solid construction with a lot of reinforcements
- manual side shift
