Description

Rocky One “Mountain” is equipped with a joystick system of acceleration control.
This version is suitable for particularly steep fields. It offers greater control through the use of the joystick and guarantees excellent stability even in presence of slopes, thanks to the auto temporized electric-brake installed in our Rocky One models.
The Rocky series of innovative vehicles is designed to make your work easier and more efficient. We are focused on new needs and offer various options to adapt our products to the specifics of each task.
