

Agro-Osek S237

2 Row transplanter

Parameters

Name	Unit
Minimum HP	30 hp
Length	1500 mm
Width	1400 mm
Height	1080 mm
Number of rows	2 row

Description

The machine can be used for planting: cabbage, lettuce, celery, tomatoes, peppers, strawberries, roses, shrubs, spruce, pine seedlings. It has 2, 3 or 4 row version. The seedlings can be carried on the plate so the workers can refill the plants in their hands, it is a very common way to plant seedlings. It connects to the tractor via 3 point linkage.
