Parameters

Name	Value
Weight	0,07 kg

Description

- GRANIT screw-locking adhesive saves costs. Instead of special fixing screws, normal self-tapping screws can be used, which are significantly cheaper. GRANIT screw-locking adhesives meet the highest demands on the load-bearing capacity of screw connections. They are suitable for the vibration- and shock-resistant fastening of all types of screws with transverse and axial loads. The adhesive fastens and seals the thread at the same time, providing ideal protection against corrosion.
- Vibration-resistant
- One-component - clean and easy to apply
- Can be used for all types and shapes of threads
- Seals the thread in one go
- Anaerobic adhesive is a one-component adhesive that hardens by excluding air.
- Anaerobic adhesive bonds, seals and secures screw connections, components, bearings and pipe connections safely, easily and permanently
- Anaerobic adhesive replaces conventional fastening methods such as dowel pins, washers and spring washers
