Parameters

Name	Value
Width	700 mm
Height	1090 mm
Length	1000 mm
Capacity (liter)	300 l

Description

The Zocon seed drill is a high quality pneumatic seed drill for fine and coarse seeds. Specifically developed with an eye for user-friendliness and effectiveness. The machine is composed of high quality components. The twin blower, for example, provides a large air displacement capacity for a large working range. The sowing motor, with specially developed 350 x 50 mm sowing rollers, ensures an accurate and large sowing capacity. The elements of the sowing roller are mounted in a spiral to ensure a very accurate and proportional seed distribution. The quick-change systems of the Zocon seed drill make it possible to change implements in a very short time. In addition, the Zocon seed drill is equipped with an integrated collection container and rotary switch for quick and easy changeover.

Basic equipment:

- "Basic" control box removable and moisture resistant (prepared for optional signal cables and sensors)
- 24 positions for sowing rate and air displacement
- 5-stage adjustment rubber seal
- Electrically driven Twin blower
- Electrically driven seed rotor with quick-change system
- Quick-change system outputs (output not included)
- Plate for quick-change seeder between different implements (1 piece included)
- Galvanized frame and white and transparent plastic hopper for level indication with hinged lid
- Integrated collector for a quick/accurate calibration test
- Integrated storage for an extra seed rotor, clamps, etc.
- 1 bundle of hose 25 meters Ø30 mm
- Cable for power supply directly from tractor battery
- Choice in 4 different seed rotors (1 included)
