Working pressure	160-400 bar
Dimensions	7400x4500x7000 mm

Description

- □□ Greentec Shark 4 – Compact Power for Precision Stump Removal
  The Greentec Shark 4 stump grinder is the perfect blend of agility and efficiency, designed for professionals who need a reliable solution for removing smaller stumps quickly and cleanly. Whether you're maintaining urban parks, managing orchards, or preparing agricultural land, the Shark 4 excels where larger machines can't reach.

  Its compact design allows for precise operation in tight spaces, while the hydraulic drive ensures smooth and controlled grinding. Thanks to its dual-cylinder hinge mechanism, the cutting wheel moves effortlessly in both directions, making stump removal fast and effective. The integrated splash guard helps contain wood chips, keeping the work area cleaner and safer.

  The Shark 4 can also be equipped with a foldable push blade, providing extra stability during grinding and even allowing for light ground leveling. It’s compatible with various quick couplers (CW10, Lehnhoff MS03/MS08, etc.), making it easy to mount on compact loaders or mini excavators.

  □ Recommended for:
  Municipal and urban green space maintenance
  Agricultural use in orchards and vineyards
  Operators with smaller machines who need a compact yet powerful stump grinder

  The Shark 4 isn’t just a tool—it’s a versatile, practical companion that simplifies land clearing and streamlines your workflow. If you value precision, clean operation, and dependable performance, this model is built for you.
