Description

The Greentec Shark 4W stump grinder is a compact yet surprisingly versatile machine, designed specifically for professional use. It’s the ideal choice for those looking to remove small to medium-sized stumps efficiently—especially in areas where larger machines simply can’t fit.

What sets the Shark 4W apart is its stable yet lightweight design, allowing for precise operation even in tighter spaces. Thanks to its dual-cylinder hinge mechanism, the grinder moves smoothly in both directions, ensuring consistent and controlled cutting. The integrated splash guard helps minimize chip scatter, while the foldable push blade adds extra stability during grinding and can even be used for leveling the ground.

This machine is made for professionals who value speed, cleanliness, and safety. Whether you're maintaining urban parks, preparing agricultural land, or clearing smaller forested areas, the Shark 4W is a reliable partner in land management.
