Parameters

Name	Value
Oil flow	100-130 l/min
Excavator weight	10-14 t
Weight	230 kg
Working pressure	160-380 bar

Description

The Greentec Shark 6 stump grinder is the perfect middle ground for professionals who need more power than the compact Shark 4W offers, but don’t yet require the heavy-duty capacity of the Shark 8. It’s an ideal solution for removing medium-sized stumps efficiently and reliably—whether you're working on agricultural land, public spaces, or smaller forestry projects.

What makes the Shark 6 stand out is its modular design, which allows it to be mounted on a wide range of hydraulic cranes, from 5.5 to 14 tons. This flexibility means it can grow with your equipment fleet and adapt to different job sites. Despite its powerful 66 cm grinding wheel, the machine remains compact and lightweight, offering excellent maneuverability. Its oil-bath bearing system ensures robust, low-maintenance operation, while the dual chain setup helps contain wood chips for a cleaner workspace.

The Shark 6 is especially well-suited for:

Operators who have outgrown the Shark 4W’s capacity and need more grinding power without stepping up to the bulk of the Shark 8.
Professionals working with multiple crane types who value compatibility and modularity.
Users who prioritize clean, safe, and efficient stump removal in varied terrain.

If you're looking for a versatile, mid-range stump grinder that combines strength with smart engineering, the Shark 6 might be exactly what your workflow needs.
