Parameters

Name	Unit
Weight	760 kg
Working pressure	250-420 bar
Oil flow	80-220 l/min

Description

Hydraulically driven stump grinder designed for 15-28 ton excavators. It is the ideal solution for fast and efficient stump removal in orchards, parks, forests, and urban areas.

Key Technical Specifications:

Grinding wheel diameter: 870 mm

Grinding wheel thickness: 40 mm

Cutting teeth: 2 × 22 hardened teeth

Compatible excavators: 15-28 t

Advantages:

Compact, stable design for easy maneuvering

Hydraulic motor with low maintenance

Two rows of strong chains to minimize flying debris

Oil-bath main shaft for long service life

Foldable support legs for stability

Optional side cutting blades for faster stump removal
