Parameters

Name	Value
Weight	700 kg
Oil flow	35-75 l/min
Hydraulic pressure	175-225 bar
Working width	Left: 12000 Right: 10000 mm

Description

The price of the machine shall include:

- Side walls
- It's a tie to hold the ball.
- Manitou fast connector

The Flingk SHC Straw Spreader is a compact and light straw sprayer. The machine is specially designed for small farms and power engines. The SHC type has a drum blower with a rash
control the pitch distance and thus the depth of the vehicle's embedding from the cab. The SHC R 275 ° has a rotating discharge for quick and flexible work.

Flingk SHC 1450 R is a high-performance self-loading straw spoon designed for versatility and precision. The "R" marking represents the 360-degree drop slide, so it is a perfect tool for complex stables.

Main characteristics:

Cylinder slide 360 ° (model R): The hydraulic chute allows the distribution of straw in any direction - left, right or straight forward - with maximum flexibility in narrow corridors.
Self-loading design: The massive frame allows the operator to pick up the bales directly from the ground, so no additional loading machine is needed.
Versatile processing: Efficient handling of both square and round bales. A heavy-duty shredder will crush the straw before the high-capacity turbine blows it out.
Impressive range: Depending on the hydraulic flow, you can reach a distance of 10 to 12 metres, providing full coverage even in large, deep-sea areas.
Compact and powerful: specially designed for telescopic loaders and wheeled loaders, providing a low centre of gravity for better stability of the machine.
