Description

The log splitter SPL10H by Ceccato Olindo is a log splitter with Honda GP160 vertical internal combustion engine entirely made in Italy designed for home use. The SPL10H with a thrust of 10 tons and a double reinforced tubular frame, allows you to split wood logs, even knotty, of varying sizes up to a maximum height of 55 cm. The components used on this log splitter have a high quality. It is equipped with a double pump of great capacity that guarantees a powerful thrust and a double speed of work. It is also equipped with two wheels for the movement realized with a particular rubber mixture that allows the stones not to get stuck. The machine weighs about 125 Kg. In this model, as for the other Ceccato Olindo's models, the attention to details is very high, it has hydraulic hoses with canvas sheath screen-printed Ceccato Olindo and mouth in the fittings that fully respects the latest CE regulations. The log splitter BULL SPL10H by Ceccato Olindo respects the CE regulations on safety at work.
