Description

The SPL12H log splitter by Ceccato Olindo is an entirely Italian vertical log splitter designed for domestic and semi-professional use. It is a log splitter with a reinforced frame, completely welded robot, very robust, mounts a support tube to the knife in Domex steel, a hardened steel knife and electrical and hydraulic components of the highest quality. It is a log splitter with a very important structure. The components used on this log splitter has a high quality, the piston is increased. It mounts a Honda GX200 internal combustion engine. It is also equipped with two wheels for the movement made with a special rubber mixture that allows the stones to not get stuck. In this model, as for the others of Ceccato Olindo, the attention to details is very high, it has hydraulic hoses with canvas sheath screen-printed Ceccato Olindo and mouthpiece in the fittings that fully respects the latest EC regulations. The machine weighs about 154 Kg. The log splitter BULL SPL12H by Ceccato Olindo complies with the EC regulations on safety at work.
