Working table	360x410 mm
Dimensions	1115x810x2700 mm
Engine	Honda GX200 HP
Drivegear	gasoline engine

Description

The BULL SPL16H log splitter by Ceccato Olindo is an entirely Italian machine made for professional use. It is built with a custom cast steel knife of large size that runs on a guide bushing safeguarding the piston and the frame even under maximum stress, has a very strong frame designed to withstand high power thrusts. Allows you to split knotty wood logs of varying sizes up to a maximum height of 110 cm. It mounts a bench that allows two cutting heights, 51 cm or 110 cm. It is equipped with additional operating controls on the upper part of the machine that allow the splitting of very large logs. It is possible to add mechanical lifting of the logs as an option. It has a Honda GX200 engine. It is equipped with two wheels for movement made with a special rubber mixture that allows the stones not to get stuck. It is equipped with a safety arch and an adjustable end-of-stroke control system. In this model, as for the others of CECCATO OLINDO, the attention to details is very high, it has hydraulic pipes with canvas sheath screen-printed Ceccato Olindo and couplings that fully comply with the latest EC regulations. The machine weighs about 347 kg. The log splitters BULL SPL16H complies with the EC regulations on safety at work.
