Parameters

Name	Unit
Drivegear	electromotor
Performance (Kw)	5,5 kw
Supply Voltage	400 V
Thrust	20 ton
Wedgestroke	1140 mm
Maximum height of the splitted wood	540 - 1140 mm
Working table	360 x 410 mm
Weight	375 kg
Dimensions	1115 x 810 x 2700 mm
Drivegear	electromotor

Description

The SPLE20 wood splitter is an electric machine INTERALLY MADE IN ITALY made mainly for professionals, in fact it is built with a large knife, guided by skids along a steel guide, which even under maximum effort safeguards the cylinder. It allows to split knotty wooden logs of variable dimensions up to a maximum height of 110 or 51 cm. It is equipped with additional drive controls located in the upper part of the machine that allow to split very large logs. It also has a three-phase motor and a high capacity pump that guarantees a powerful thrust and a great working speed. It is equipped with 2 wheels for moving and a three-point hitch for the tractor. It is equipped with a safety arch and automatic adjustable limit switch control system. It needs 400 volt to be operated.
