Parameters

Name	Unit
Drivegear	electromotor
Performance (Kw)	5,5 kw
Supply Voltage	400 V
Thrust	25 ton
Wedge stroke	1140 mm
Maximum height of the splitted wood	540 - 1140 mm
Working table	360 x 410 mm
Weight	420 kg
Dimensions	1200 x 930 x 2750 mm
Drivegear	electromotor

Description

The SPLE25 wood splitter is an electric machine INTERALLY MADE IN ITALY made mainly for professionals, in fact it is built with a large knife, guided by skids along a steel guide, which even under maximum effort safeguards the cylinder. It allows to split knotty wooden logs of variable dimensions up to a maximum height of 114 cm. It is equipped with additional drive controls located in the upper part of the machine that allow to split very large logs. It also has a three-phase motor and a high capacity pump that guarantees a powerful thrust and a great working speed. It is equipped with 2 wheels for moving and a three-point hitch for the tractor. It is equipped with a safety arch and automatic adjustable limit switch control system. It needs 400 volt to be operated.
