Working table	500 X 380 mm
Weight	240 kg
Dimensions	1100 X 810 X 1840 mm
Minimum HP	18 hp

Description

The wood splitter SPLT13TC is a machine entirely made in Italy working with cardan shaft made mainly for professionals, in fact it is built with a large knife, guided by skids along a steel guide, which even under maximum effort safeguards the cylinder. It allows to split knotty wooden logs of variable dimensions up to a maximum height of 110 cm. It is equipped with additional drive controls located in the upper part of the machine that allow to split very large logs. It is equipped with a high capacity pump that guarantees a powerful thrust and a high working speed. It is also equipped with 2 wheels for moving and a three-point hitch for the tractor. It is equipped with a safety arch and automatic adjustable limit switch control system. It needs a minimum 18 HP tractor to be operated.
