Description

These machines process the soil and bury stones, clods, debris and cultural residues with great efficiency, even in difficult conditions and in not previously prepared fields. The inverted rotation of a special rotor (opposite to the forwarding direction) combined with a selector rake and a levelling bar cover the buried material with a fine and clean soil layer. Stone buriers simplify the seeding/transplanting operations of several vegetable- and special crops creating very well formed, stable and porous cultivation beds. This series is very large and it's composed by single, double, triple fixed and folding/foldable machine to suit every kind of job and tractor power. Universal 3 point linkage Cat. 1 & 1s, Single speed gearbox 540 rpm PTO, Lateral transmission driven by chain in oil bath, Automatic chain tensioner on spring, Removable flanged rotor, 4x Spade blades per flange, Wearing steel protection counter-flanges, Working depth adjustable by crank handle, Rear selector rake mounted on lateral springs, Cardan shaft with shear bolt torque limiter SB type (1"3/8 Z=6 tractor side yoke)
