Description

These machines process the soil and bury stones, clods, debris and cultural residues with great efficiency, even in difficult conditions and in not previously prepared fields. The inverted rotation of a special rotor (opposite to the forwarding direction) combined with a selector rake and a levelling bar cover the buried material with a fine and clean soil layer. Stone buriers simplify the seeding/transplanting operations of several vegetable- and special crops creating very well formed, stable and porous cultivation beds. This series is very large and it's composed by single, double, triple fixed and folding/foldable machine to suit every kind of job and tractor power. Universal 3 point linkage Cat. 2 & 3 + ASAE 3^a, Tractor linkage swinging arms, Single speed gearbox 1000 rpm PTO, Double Lateral transmission driven by chain in oil bath, Automatic chain tensioner on spring, Front dual metal face seals in oil bath on rotors, 2x rotors with central support, Removable flanged rotors, Rotor fitting 6x spade blades per flange, Wearing steel protection counter-flanges, High resistance steel side pannel, Lateral transmission with cardan shaft, Working depth adjustable by crank handles, Rear double selector rake mounted on lateral springs, Cardan shaft with shear bolt torque limiter SB type (1"3/8 Z=6 tractor side yoke)
