Description

These machines process the soil and bury stones, clods, debris and cultural residues with great efficiency, even in difficult conditions and in not previously prepared fields. The inverted rotation of a special rotor (opposite to the forwarding direction) combined with a selector rake and a levelling bar cover the buried material with a fine and clean soil layer. Stone buriers simplify the seeding/transplanting operations of several vegetable- and special crops creating very well formed, stable and porous cultivation beds. This series is very large and it's composed by single, double, triple fixed and folding/foldable machine to suit every kind of job and tractor power. Universal 3 point linkage Cat. 2 & 3, Tractor linkage swinging arms, Single speed gearbox 1000 rpm PTO, Central standard cardan shaft (1"3/8 Z=6 tractor side yoke), Lateral cardan shaft with automatic torque limiter SC type, Central machine joint with automatic limiter SC, Pair of front discs adjustable in height and width on lateral machines, Pair of middle ploughshares adjustable in height and width, Swinging and side adjustable machines supports, Bases and joints for machines linkage, Pair of supporting rear wheels for central machine, Hydraulic system for opening and refolding, Hydraulic locking system for transport position, 225 cm wide during transport, Rear lights bar
