Description

Machinery composed by a well-proportioned frame and a fast turning rotor, complete with blades or hammers according to the working conditions and cutting typology. Rear rollers or rear wheels support the machine and through different regulations they allow the adjustment of the cutting height. These machines are suited for grasslands maintenance, pruning shredding, chopping of cultural residues and uncultivated fields. The series is composed by front and rear fixed machines, side shifting ones – by mechanical or hydraulic system – and folding machines up to 700cm working width. Universal 3 point linkage Cat. 2 and 3, Folding frame with hydraulic system for machinery opening and refolding, Gearbox 1000 rpm with overrun clutch, Double Rotor with universal blades, Roller bearings for rear roller, Counterblade on inner frame (only for machine fitting blades), Double lateral transmission driven by belts with automatic belt tensioner, Adjustable rear roller Ø220 mm or pair of 180° steering & adjustable rear wheels, Rear hood, Front protection flaps, Deflectors (conveyors of chopped material)
