Parameters

Name	Unit
Working width	1100 mm
Weight	230 kg
Minimum HP	15-20 hp
Working depth	120 mm
Number of rotavator blade	30 pcs
RPM	540 rpm

Description

The compact and lightweight design of the T-MKMR 110 makes it ideal for precise soil cultivation in small to medium family farms, nurseries, and plantations. Its mechanically driven rotor ensures dependable operation, while heat-treated steel blades maintain sharpness over extended use. A sturdy shaft and easily accessible grease points simplify routine maintenance. Compatible with smaller tractors and featuring a fixed width for consistently even results, it's a cost-effective choice for growers managing modest acreage with versatile soil-working needs.
