Number of rotavator blade	30 pcs
Working depth	120 mm

Description

The compact and lightweight design of the T-MKMR 110 makes it ideal for precise soil cultivation in small to medium family farms, nurseries, and plantations. Its mechanically driven rotor ensures dependable operation, while heat-treated steel blades maintain sharpness over extended use. A sturdy shaft and easily accessible grease points simplify routine maintenance. Compatible with smaller tractors and featuring a fixed width for consistently even results, it's a cost-effective choice for growers managing modest acreage with versatile soil-working needs.
