Parameters

Name	Unit
Working width	1850 mm
Weight	440 kg
Working depth	190 mm
Number of rotavator blade	42 pcs
RPM	540 rpm
Minimum HP	40-45 hp

Description

The T-MKR 1850, with its 180 cm working width and hydraulic side-shift, effortlessly prepares soil in medium to large family farms where fast and uniform tillage is essential. Its robust welded frame and interchangeable steel blades ensure reliable performance even in hard, stony ground. The hydraulic offset allows precise work along rows and around field corners, reducing the number of passes needed. Central grease points and quick-release shaft connections make maintenance simple and time-efficient. An economical investment for farmers seeking a versatile implement for arable soil cultivation.
