Parameters

Name	Unit
Weight	4810 kg
Power	74 HP
Lifting capacity	2500 Kg
Lifting height	5680 mm
Engine	Kubota V3307

Description

The Eurotrac TH25.6 is a versatile loader designed for agricultural and industrial use. It is powered by a Kubota Stage V engine, which delivers 74 hp. It has a lifting capacity of 2500 kg and a maximum lifting height of 5.68 metres. It is powered by 4x4 and four-wheel steering with hydrostatic drive and two gear ratios. It is equipped with radio, fan, camera and LED lighting for comfort.

The machine is especially recommended for farmers who need a heavy-duty and reliable machine, industrial users who value high lifting capacity and versatility, and construction contractors who need a strong and durable machine for their daily work. If you have any further questions or would like to request a demo, please visit the website or contact us using the contact details provided!
