

Jansen Transport casters (set) for MB-300 und MB-360°

Transport casters (set) for mini excavator

Description

The transport casters for the mini excavator MB-300 und MB-360° can simply be screwed on to the support legs, the holes for this have already been drilled.

By turning the support legs through 90°, one can easily change from the support Position into the transport Position. This feature allows to move the mini excavator conveniently for short distances, e.g. to the storage room.
