Description

The reinforced TRB-RAW models are manufactured in 1.50 and 1.80 mts, the machine is manufactured in high quality steel plate with 3 lines of counter-hammers, high quality hammers and steel screws make up the rest of the cutting element. Hydraulic displacements and crushing capacity up to 12-13 cm. TRB-RAW branches and weed shredder

High quality agricultural mulchers whose performance makes them ideal for both fruit and standard tractors from 50 to 100 HP. This model is manufactured with hydraulic displacement, side skids and rear door with attached roller. The system of opening the gate with the roller is carried out by hydraulic cylinders for work in reverse position.

Standard:

- Wear-resistant plate chassis.
- 180 mm rotor shaft.
- Piston hatchback.
- Rear roller attached to 200 mm gate.
- Side skates.
- Hydraulic displacement.
- Freewheel unit.
- Front chains.
