Weight	1190 kg
Working width	2000 mm
RPM	540-1000 rpm
Max tree diameter	15-18 cm
Minimum HP	100 hp

Description

The TRB-RAW-HMF semi-forestry mulcher represents a breakthrough in lightweight fixed hammer models. Specially designed for low and medium power tractors from 100 to 140 HP. Fitted with 20 mm thick shafts, with straight tine fixed hammers interchangeable with double tine fixed hammers. This hammer configuration allows the shredding of bushes up to 15-18 cm in diameter, particularly suitable for palm leaves and all types of deforestation and clearing work with very good results with small and medium power tractors. These models with hydraulic lift-up tailgate and hydraulic side shift allow various jobs in spaces where it is necessary to move the machine to the limit, while allowing you to work on all types of grass with an extra-fine cut.
