Parameters

Name	Value
Weight	980 kg
Working width	1100 mm
RPM	540 rpm
Minimum HP	90 hp
Drivegear	hydraulic engine

Description

MOWING GRASS **TS530** for cutting grass and shrubbery in roadway embankments in the presence of obstacles as guardrails, curbstones, signs. TS530/FC R150 is the mower mounted front,or on the centre of the tractor; specially designed for cutting grass on road shoulders in the presence of guard-rails. A PATENTED device (R150) allows to rotate the outer side of the support enabling to overtake obstacles like plants, road-sign or lighting posts. Safety during operation is guaranteed by means of electric controls that stop the cutting-blade rotation in case the outer part of support opens or the overtaker overturns. A specially designed hydraulic circuit enables to set the most suitable operational parameters. Useful cutting lenght about 100 cm.

Proportional hydro-electric controls with console .
