Description

Disc Harrow tills the soil with disturbing the soil surface without touching deep layers. It prepares the seedbed with faster working speeds. It is one of the most efficient ways for breaking the weeds and plant wastes after harvest. It also mixes the mineral fertilizer with soil.

It operates on the surface of the field, saves fuel and time.

It organises the soil in one pass and prepares the seedbed.

It can be used for stubble, weed and plant waste breaking.

It is one of the best ways of mixing the fertilizer with the soil.
