Sidemove (mm)	22 < > 22 mm
Minimum HP	70 hp

Description

Rotavator or rotary tiller is a tillage machine mixes the soil from bottom to the surface with the help of horizontally rotating blades. It is used for preparing seed beds, shreding and mixing plant wastes on small fields, gardens and vineyards.

Tillage machine that crumbles the soil so the seeds will find an easy way to grow.
Mixes the plant wastes into soil homogeneously.
Plant wastes that mixed with soil makes the soil more organic and fertile.
Skid hydraulic system with sensor automatically shifts the machine when the machine encounters a tree or a hard material.
